THINKING ABOUT DESIGN-1

I have chosen an object which mostly everyone uses through the winter and the rainy season. It is Good night Fabric Roll-On. It is used to repel mosquitoes away from your body by the smell. By just applying 4 coin size dots.

The design is very good. When you open it its got a roll on which is very easy to use. You just have to rub it on the clothes which you are wearing. I feel that maybe this idea had come of using a ball pen as It uses the same technique but in a enlarged form. On the cap of the roll-on bottle there is even a hook which can be used to hang the bottle anywhere in your backpack. The size of the bottle is also perfect for both home use and outside use. Its just the new age mosquito repellent as it does not need the applying of cream eg: odomos due the beauty of the design. The design also appeals children as they the one you need to protect from mosquitos.
